43-020 AERO RACE BIBSHORT

TESTING MAKES PERFECT.

The July 2011 issue of Cycling Plus magazine had a head-to-head test of top shorts from 18 different manufacturers, and the Free Aero Race Bibshort was named absolute best. As in racing, results like that come from years of hard work and preparation.

This short debuted in 2007 but benefits from years of constant refinement, including 4 years of ProTour testing, as we try new ways to make it better. The changes for 2012 are only in the Progetto X2 Air seat pad and the Giro3 leg gripper because it's getting harder and harder to find things to improve.

1. Famous free bib keeps your chest free to avoid overheating.
2. Action™ micro fabric in the saddle contact area provides durability.
3. Shield™ micro fabric front, sides and back provides outstanding stretch and return.
4. Flat-seam construction throughout short giro3 single-layer sublimation-printed leg ending.
5. Progetto x2 air seat pad for famous x2 comfort and improved air flow.
