43 057 - AARO RACE JERSEY

THE FASTEST JERSEY IN THE PRO-PELTON.

This is the jersey that started the Aero revolution back in 2007 and has been imitated by nearly every manufacturer and team.

It has been in continuous evolution ever since and we've now exceeded 70 prototype iterations in our quest for speed. When things heat up, the Aero Race Jersey has a big number going for it, the lightweight and very slippery aero jersey saves 40 seconds per hour over a standard jersey, which translates to 12 watts at 40kph.

The Aero Race advances technology in the neck and arm areas where the use of Giro3 grippers creates an absolute form fit in these critical airflow areas. A tight knit mesh back gives body heat release while still offering UV protection. The jersey features a quarter length front zipper and three rear pockets.

1. Aero technology saves 10 watts at 40km/h compared to a normal race-fit jersey
2. Velocity™ fabric front and shoulder with Prosecco treatment keeps you dry
3. Open-mesh back for breathability
4. 35CM front camlock YKK zipper
5. Silicone gripper elastic at waist
6. Custom Giro++ single-layer engineered gripper on sleeves for flat aero fit
7. Three rear pockets
